Looking forward to meet you in Fukuoka!

Conference Secretary
Vivian Zhang (Ms)

PDF and HTML Proofs: available for review | "Future-Forward Governance: Catalyzing Public Excellence via E-Public Engagement in Smart City Innovations" (ID: 71) in "IC4E 2024"

tapsadmin@aptaracorp.awsapps.com <tapsadmin@aptaracorp.awsapps.com>

Dear Neng Susi Susilawati Sugiana,

The PDF and HTML proofs for your paper, "Future-Forward Governance: Catalyzing Public Excellence via E-Public Engagement in Smart City Innovations (ID: 71)", are now available for your review. For your convenience, the PDF proof is attached to this email. Sometimes your PDF may have layout related issues like text overlapping, extra white space, large floats (table/figure) moved to the end of document or a blank page generated at the end, please report all these points to Tapssupport, they will help you rectify these. You may review the HTML version of the article on the author dashboard of The ACM Publishing System (TAPS) (<http://camps.aptaracorp.com/AuthorDashboard/dashboard.html?key=0&val=86667d5c-249f-11ef-8182-18bb50361d1f>).

After you have reviewed the proofs for your article and there are no further revisions that need to be made, you will then need to approve your article in TAPS. If we do not receive your approval of your article within the necessary timeframe for publication, it may be necessary for the conference's leadership to move your article through the remainder of the production process to ensure the proceedings volume is published in a timely manner.

Should you have any issues, please contact confsupport@aptaracorp.com for assistance.

Sincerely,
ACM TAPS Production Support Team
