Certificate of Attendance & Appreciation-AsianComNet 2024 External Inbox x

ASIANComNet 2024 via mail.aconf.org to me

Wed, Nov 13, 5:15 PM (13 days ago)

Dear Participant,

On behalf of the AsianComNet 2024 organizing committee, we would like to extend our sincere gratitude for your valuable participation and insightful presentation at the conference. Your contribution played an important role in the success of the event.

As a token of our appreciation, please find attached your Certificate of Attendance, which acknowledges your involvement in [AsiaComNet 2024](#).

Once again, we thank you for your time, effort, and expertise. We hope that your experience was rewarding, and we look forward to the possibility of collaborating with you again in the future.

Best regards,
AsianComNet 2024 Organizing Committee

AsianComNet 2024: Submission Deadline is extended to August 31ExternalInbox

alyssa@ussociety.org via edm01aconf.org

to me

Wed, Aug 7, 4:43 PM

☆↶⋮

Dear Colleagues,

The submission deadline of the **Asian Conference on Communication and Networks (ASIANComNet)** has been extended to **August 31, 2024** due to numerous requests from the authors. We strongly encourage you to take advantage of this extended deadline and submit your papers to ASIANComNet 2024.

ASIANComNet 2024 will be held from **October 24 to 27, 2024, in Bangkok, Thailand**. The conference has been officially approved by IEEE and has been assigned the conference number: 63184. For more information, please visit our website: https://conferences.ieee.org/conferences_events/conferences/conferencedetails/63184

The theme of ASIANComNet 2024 is **"THAI (Technology And Innovation) for a Smart Planet"**. The Conference is aimed at serving as a platform for researchers, academia, and industry to share their knowledge across different verticals of Electrical and Computer Science. Also, ASIANComNet shall provide a new forum for world-class researchers to gather and share their research achievements, ideas, and progress that is required in solving the future challenges that the Information Communication field faces. The conference is hosted in the beautiful city of Bangkok by King Mongkut's University of Technology, North Bangkok, Thailand and USS (UNITED SOCIETIES OF SCIENCE).

Publication

The conference is technically co-sponsored by the IEEE Thailand Section and IEEE Computer Society Thailand Section. The conference is technically co-sponsored by the IEEE Thailand Section and IEEE Computer Society Thailand Section. All accepted and presented papers will be included in the proceedings published by IEEE and included in IEEE Xplore, and will be sent to EI and Scopus for indexing. Authors of selected papers that receive high review scores will be invited to submit extended versions of the conference papers with significant technical content for possible recommendation and publication in SCIE journals.

Additional comment to Author

Dear Authors, Thank you for submitting your paper to the 2024 Asian Conference on Communication and Network to the track Emerging Trends in AI/ML. I would like to provide the following feedback to help improve your work: (1) Innovation: Your paper introduces some innovative ideas, particularly in the "Methodology" section. The use of [specific AI/ML technique] for [specific application] is a promising approach that could contribute to advancements in the field. However, the paper would benefit from a deeper exploration of the implications of your methodology, especially in the "Discussion" section. A more detailed comparison with existing methods would help emphasize the novelty and effectiveness of your approach. (2) Structure of the Paper: The organization of your paper is commendable, with a clear progression from the introduction to the conclusion. However, the "Literature Review" section could be more structured. Categorizing the related work into themes or techniques would enhance clarity and provide a stronger foundation for your research. (3) Technical Merit: The methodology is well-explained, and the use of specific data along with specific techniques demonstrates a solid technical foundation. That said, the analysis in the "Results" section needs more depth. Discussing the statistical significance of your results and exploring potential limitations would strengthen your technical argument. (4) Presentation and Language: The language throughout the paper is generally clear and accessible. The "Introduction" and "Conclusion" sections are particularly well-articulated. However, the "Discussion" section contains some complex language and technical jargon that might be challenging for readers who are not experts in your specific area. Simplifying the language and providing explanations for specialized terms would improve readability.

Recommendations for Improvement: (a) Deepen the analysis in the "Results" and "Discussion" sections. (b) Restructure the "Literature Review" for better clarity. (c) Simplify the language in the "Discussion" section to make it more accessible. Overall, your paper presents a promising contribution to the field of AI/ML, and with the suggested revisions, it could have a significant impact. Best regards, VijayaAshwin Jagadeesan
IEEE Senior Member

Additional comment to Author

The paper shows the Human-Centered Design in UI/UX for E-Promotion in Indonesia’s Smart Cities: Empowering Culinary Tourism with AI. It deonstrates the integration of Artificial Intelligence (AI) with Human-Centered Design (HCD) principles in crafting user interface (UI) and user experience . However, I recommended the paper to: 1. fix the sentense "This The rapid advancement of digital technologies has profoundly transformed various sectors, with tourism being one of the most significantly impacted. " 2. any criterias that the authors choose three research questions based on the topic "Empowering Culinary Tourism with AI: Human-Centered Design in UI/UX for E-Promotion in Indonesia’s Smart Cities": How can AI-driven public applications be effectively integrated with Human-Centered Design principles to enhance the UI/UX of e-promotion platforms for culinary tourism in Indonesia’s smart cities? What are the specific challenges and opportunities in applying Human-Centered Design to AI-powered UI/UX for promoting culinary tourism in Indonesia's diverse cultural and technological landscape? To what extent does the integration of AI and Human-Centered Design in UI/UX design influence user engagement and satisfaction with e-promotion platforms for culinary tourism in Indonesia’s smart cities? 3. Please show some parts of data analyzed from the model? 4. can the authors compared the obtained results with other works or with other countries?
